

TAKING ACTION On Climate Change

Nova Scotia is **already experiencing** climate change

Changing
weather patterns

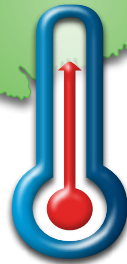

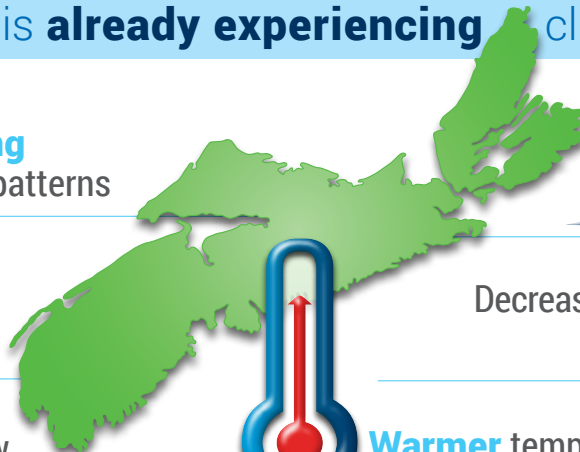

More **intense storms**
more often

Rising sea levels

More rain less snow

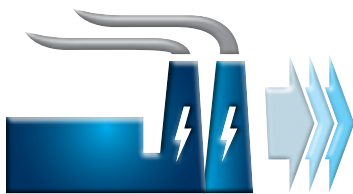

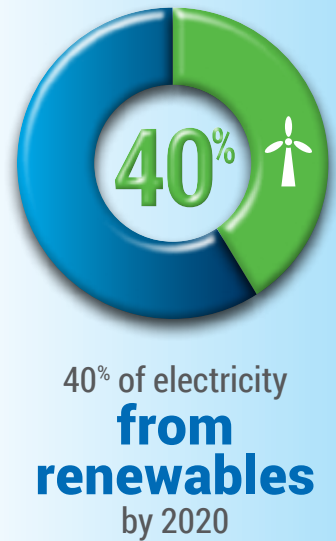

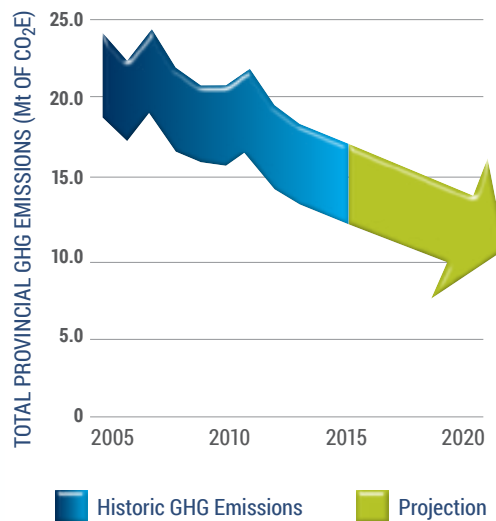

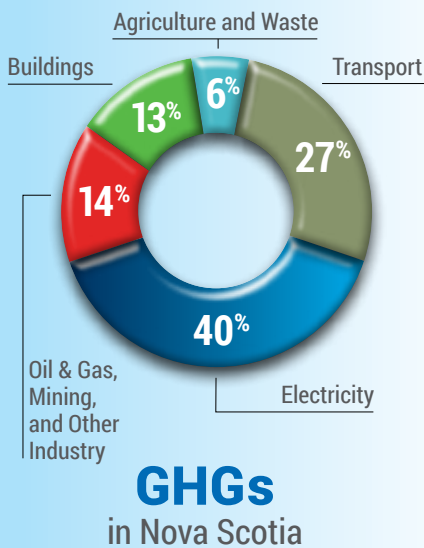

Warmer temperatures

Decreasing **sea ice**

We're **reducing** emissions

Regulated limits will cut GHGs from electricity in half by 2030

Preparing and adapting to new conditions

Online access
to provincial
climate change data

Partnerships
all levels of government, researchers,
community groups and more

50+ communities
have municipal climate change
action plans
